Need a custom formulary of medications?
Check out the Crash Cart Auto-replenishment program for single unit of measure medications.

All STAT KIT® and Crash Cart Auto-replenishment purchases come with auto-replenishment service and OnTraq™, an online tracking, compliance and account management tool. Medications are tracked and automatically replaced just prior to expiration.

This tool is to assist customers with making a kit selection and is not intended to provide clinical or legal advice. See product spec sheet for complete list of contents. It is the responsibility of the purchaser to verify product specifications and ensure the products are suitable for their intended use.
