

BIological™ 52 & 12 MAIL-IN SPORE TEST SERVICE

Simple. Accurate. Compliant.

Effortless Sterilization Monitoring.

HealthFirst’s mail-in spore testing system helps you to meet the Centers for Disease Control’s (CDC) biological monitoring guidelines. Each packet includes a dual-species test strip and a control strip for accurate sterilizer verification compatible with steam, dry heat, chemical vapor, and ETO systems.

Why Practices Choose HealthFirst:

- **Simple Process:** Run the test, drop it in the mail.
- **Accurate Results:** Third-party lab testing ensures reliable verification.
- **Automated Tracking:** OnTraq™ records results, alerts you to failures, and stores digital certificates.
- **Compliance Confidence:** Stay organized, audit-ready, and stress-free.

Options available from HealthFirst:

With 52-count and 12-count options, BIOlogical™ makes weekly testing easy and compliant so you can focus on patient care.

- Includes one test strip and one control strip per packet
- Instant alerts via email and phone for failed tests
- Digital reports and task tools keep your team on track

OnTraq: Smart Automation Technology Built to Protect Patients

- Automates regulatory compliance management
- Tracks and automatically replenishes medications and devices
- Centralizes documentation and reporting for easy audits
- Streamlines staff training and readiness
- Frees up time to focus on patients
